SUMMARY

Full stack web developer/software engineer and dynamic problem solver. Exceptional interpersonal skills with the ability to collaborate and contribute in a team setting. Strong time management and organizational abilities.

TECHNICAL SKILLS

JavaScript, Python, HTML5, CSS3, jQuery, AJAX, Node.js, React.js, Express.js, MySQL, Tailwind, MongoDB, GitHub, Git Bash/Terminal

PROJECTS

MernCave HQ Ecommerce website where you can traverse the application and purchase individual or multiple products through a Stripe transactional process.

Coding technologies used: JavaScript, React, MongoDB, Express.js, Node.js, HTML5, CSS3: https://github.com/Guapguap/day-planner | https://merncavehq.herokuapp.com/

Take-a-Hike Group project utilizing three APIs to https://www.nps.gov/ , https://openweathermap.org/ and https://developers.google.com/maps (google maps). This application allows you to search for parks to find an ideal hiking destination with information/location of each park and the relevant weather forecast.

Coding technologies used: JavaScript, HTML5, CSS3, jQuery, AJAX Link: https://github.com/Guapguap/travel-project | https://guapguap.github.io/travel-project/

Weather Dashboard Current weather forecast with multiple API calls into https://openweathermap.org/ for a current and five day weather forecast per city searched. LocalStorage is used to generate a recently searched section that is able to be utilized as a, "quick-search" section.

Coding technologies used: JavaScript, HTML5, CSS3, jQuery, AJAX Link: https://github.com/Guapguap/weather-app | https://guapguap.github.io/weather-app/
